

Congratulations on your purchase of the TimeTEX Gift Treasure Chest and have fun with it! You will give the recipient a lot of pleasure and motivation by picking out the presents it contains! This will motivate others to do everything they can to secure such a great gift according to the rules you have set. We have deliberately chosen a cardboard material for the treasure chest, i.e. from an environmental point of view, which can be erected without any additional aids such as glue. For reasons of sustainability, only the contents can be re-purchased.

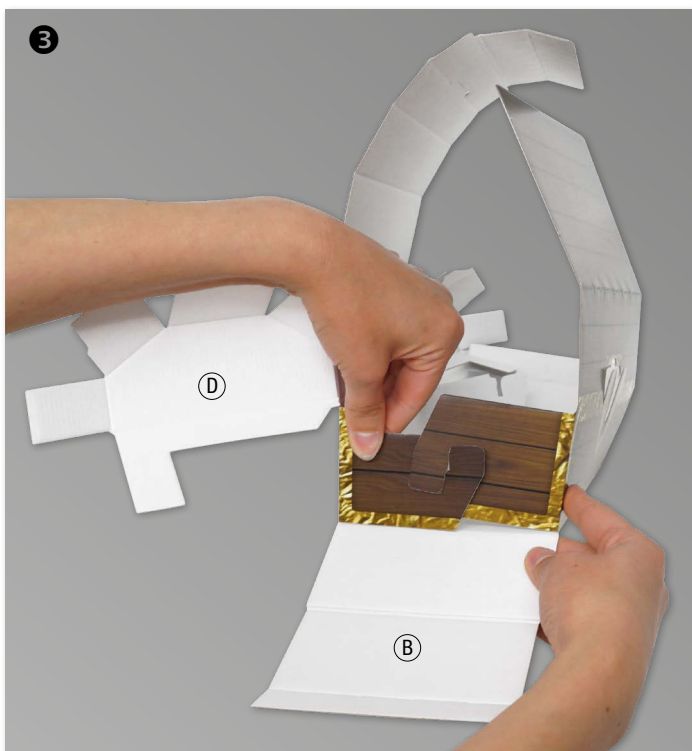

Follow these instructions step by step for successful assembly:

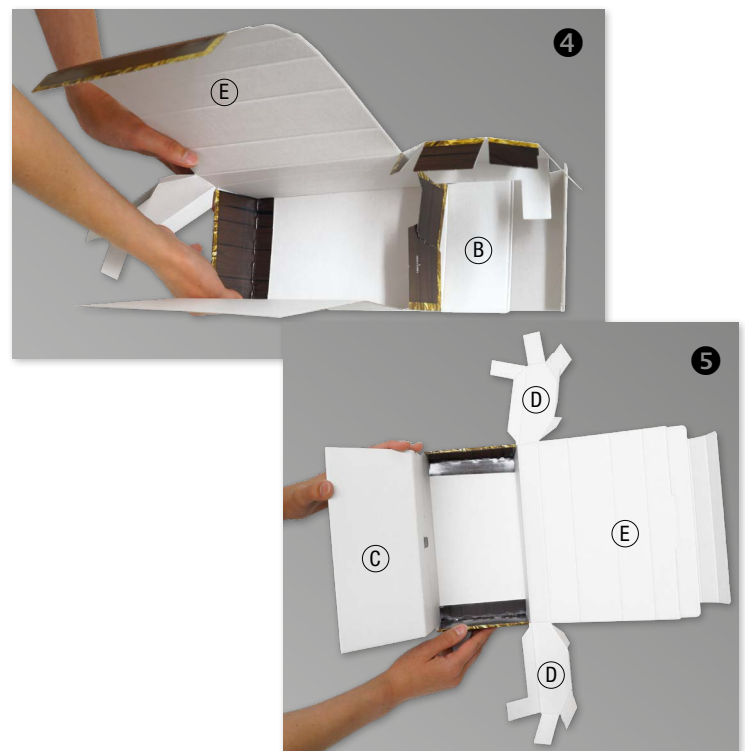

Unfold the treasure chest and place it on the table in front of you with the white side facing up. Do this so that the narrow side with the lock cut-out is close to you.

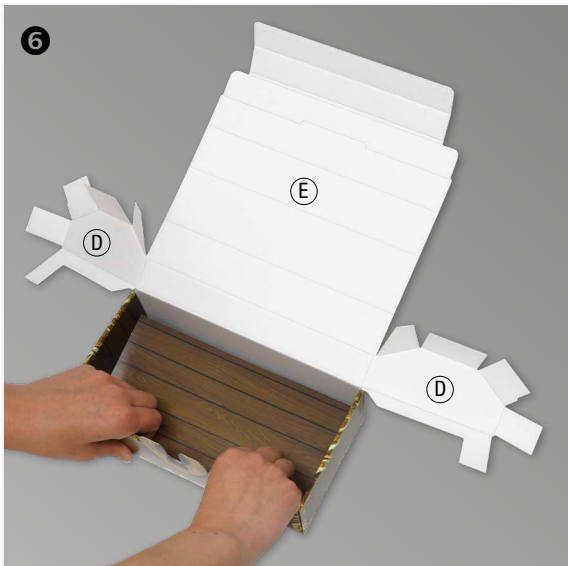

Then fold ALL the rebates of the treasure chest inwards by 180° and return to the starting position (rebates marked in red should also be folded outwards). Make sure that the two lock lips are not folded over at the same time.

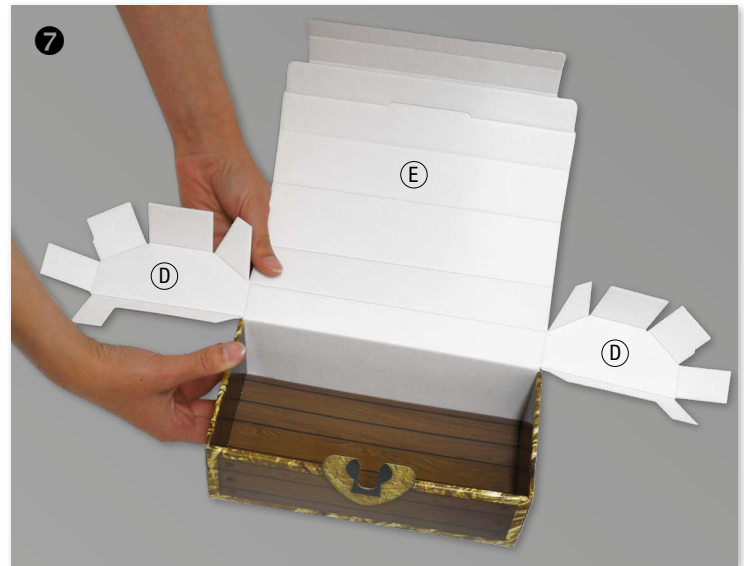

Turn the treasure chest 90°. Firstly, hang the side sections consisting of two halves on both sides A1+A2 into each other at the cut-outs.

Then fold over these connected parts with the adjacent flaps B so that the short folds on the right and left end in the floor.

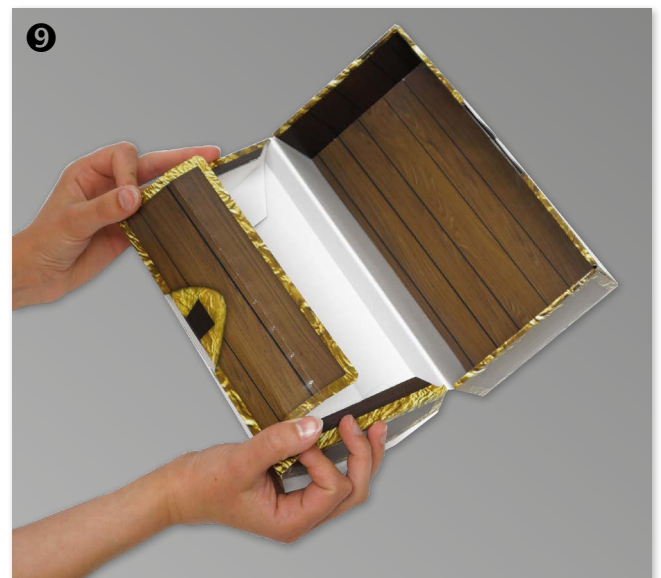

Then straighten the flap on lock side C and fold it inwards so that the printed image also covers the floor. Again, make sure that the lock lips remain in place.

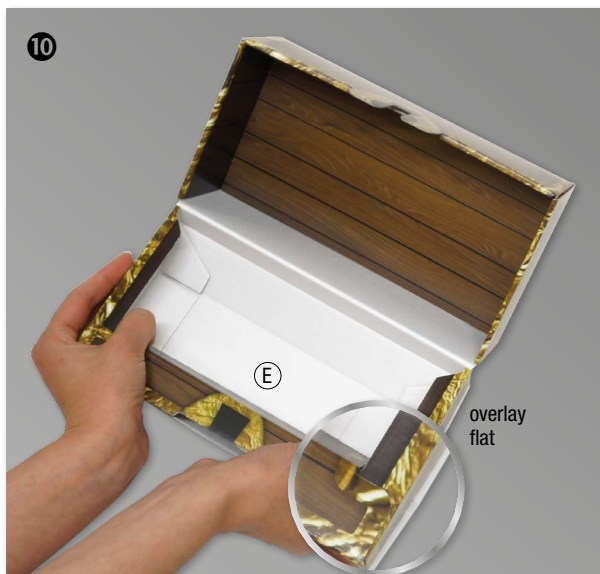

Please fold all the folds of the chest lid inwards by 180°. This is important and makes final assembly easier.

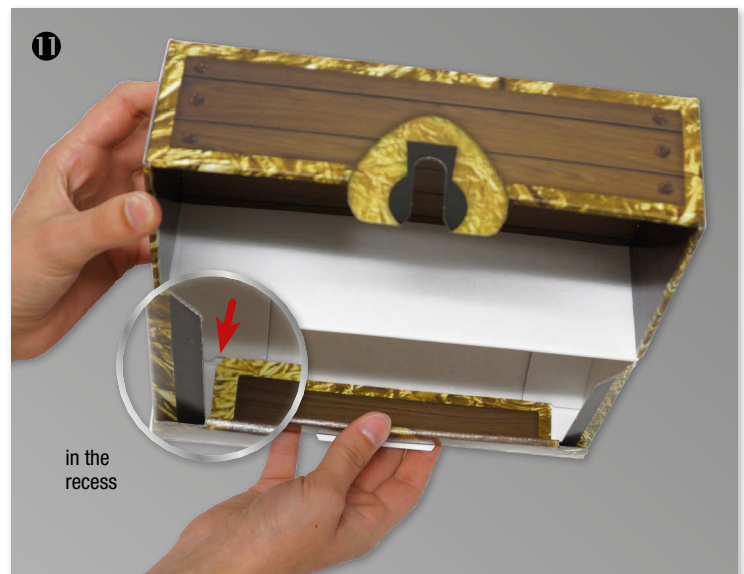

Place the two side parts and the folded parts of the cover D inwards.

The outer side of the lid E can then be placed well around these side panels D.

Do this until the third last flap (with the lock slot) rests on the bottom of the side panels.

The last two shortened tabs on the outside of the cover E are placed on the inside of the cover. Fix the last tab on the left and right in the recess provided (see red arrow) in the side panels.
