

Turning discs 400 pieces

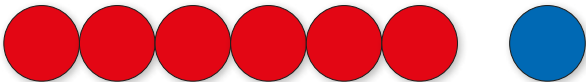

blue/red

Possible applications

1. Estimate and then count a random collection of tiles
(a solid understanding of numbers)

2. Defining
and decomposing ordered sets

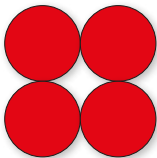

3. Find the corresponding addition
and subtraction problems for each
decomposition
(exchange, inverse and neighbouring
problems)

7

6	1
5	2
4	3
3	4
2	5
1	6

4. Set simple multiplication problems.
Set inverse problems (division)

$$2 \times 2 = 4$$

$$4 : 2 = 2$$
